13 SEP 2024

SECTION "B"

[8Q. × 5 = 40 marks]

Attempt *ANY EIGHT* questions.

1. Develop a brief Concept Paper on one of the following subjects. Make sure to specify a research problem/question.
 - a. **Robotics and Artificial Intelligence in Disaster Response:** Discuss how robotics and AI can be used to enhance disaster response efforts, including search and rescue operations, hazard detection, and recovery planning.
 - b. **Advancements in Renewable Energy Systems:** Analyze the latest innovations in renewable energy technologies, such as solar panels, wind turbines, and energy storage solutions, and their potential to meet global energy demands.
2. Develop the **Introduction** section of a formal proposal based on ONE of the following titles:
 - a. **Creating a Real-Time Air Quality Monitoring System:** Suggest a project to design a network of low-cost, real-time air quality sensors that can provide data on pollution levels, with applications in urban planning and public health.
 - b. **Development of an Energy-Efficient Electric Vehicle Charging Station at KU:** Outline an innovative electric vehicle charging station that maximizes energy efficiency, incorporates renewable energy sources, and reduces charging times.
3. Prepare a power point presentation on the topic of "**Long Report**" for the presentation to first semester students. Make at least seven slides having at least three points in each slide.
4. You are working as a part of a collaborative project in this semester. Compose a **suitable message** to your group members discussing the distribution of tasks and setting deadlines. You need to ensure effective coordination and accountability among the team members.
5. You are an experienced (old) actor in Nepal. Write a formal letter to Svetlovidov, the actor from "Swan Song," describing the current state of your career and offering him words of consolation and support regarding his own situation.
6. Narration, as a rhetorical strategy, has been employed in various texts studied this semester. Analyze how this strategy is utilized in the texts "The Making of a Scientist," "The Myth of Sisyphus," and "The Allegory of the Cave." Discuss the specific ways in which narration contributes to the development of each text's themes and arguments.
7. Prepare a **topic outline** of all eight essential and five optional components of a formal letter and what is written in each component. [Note: For instance, Body section of a letter generally contains introduction, discussion and conclusion]
8. What implications does Sagan suggest for broader societal issues if skepticism is not cultivated? How does skepticism contribute to addressing or mitigating societal challenges according to the text?

P.T.O.

9. Analyze the theme of individuality and the consequences of decision-making in Robert Frost's "The Road Not Taken." How does the poem use the metaphor of the diverging roads to explore the narrator's sense of self and the significance of choices in shaping one's identity?
